# PREFACE

This index covers the first sixteen volumes of the Journal of Accountancy, from November, 1905, to January, 1914. It is a compilation of material from two indices independently prepared, one in the office of H. Ivor Thomas, C. P. A., of Los Angeles, and the other in the office of the Journal. The aim has been to provide an index which will be at once exhaustive and practical. Titles and authors appear separately in Parts I and II, respectively, each part independent of yet supplementary to the other. Abbreviations used are explained in the note at the head of each part.

New York,

September, 1914.
